Web-Based Reporting

ExtinguisherScan™

ExtinguisherScan™

Compliance

Integrated Fire Protection's innovative, web-based solution guarantees timely fire extinguisher, first aid, and safety equipment inspections and maintenance that are fully-documented in accordance with OSHA, NFPA, and other regulatory codes. Inspection results are audited online and reviewed for certification. Intelligent compliance designed by our industry experts produces accurate, verifiable results you can trust.

Connectivity

ExtinguisherScan™ gives you unprecedented mobility and automation for accurate, verifiable inspections. Integrated Fire Protection's web-based wireless technology is convenient and easy-to-use. Our intuitive system uses any standard internet browser, so you can access reports from any location at any time for flexible management of multiple properties. Exceptions are clearly displayed in real time. Links to product bulletins and manufacturer recalls maximize your efficiency. Palm OS connectivity provides mobile solutions ranging from handheld PDAs to SmartPhones, so you are always connected.

Confidence

Integrated Fire Protection guarantees your information is secure. You control who has access to create, edit, or view data and reports in your account. Inspection data cannot be modified. Servers are vigorously protected with encryption and firewall technologies. Multiple data-backups daily, off-premise records archiving, and instant records retrieval further secure your investment. Now you can have confidence in the security and integrity of your fire and safety compliance.
